SUMMARY

I am a Cyber Security undergraduate with a strong interest in protecting systems, networks and sensitive data from evolving cyber threats and ensuring robust information security. I am passionate about network security, ethical hacking and vulnerability assessment and eager to develop my technical skills while contributing to secure and resilient digital environments.

EDUCATION

Bsc(Hons) in IT specialized in Cyber Security – SLIIT Malabe Campus

July. 2024– Present

- Currently pursuing a BSc (Hons) in Information Technology, specializing in Cyber Security at SLIIT.
- Studying core areas including programming, networking, database systems, and information security principles.
- Gaining practical experience through academic projects focused on software development, system security, and problem-solving using modern technologies.

G.C.E (A/L) Examination – Sivali Central College, Ratnapura

December. 2023

- Completed G.C.E. Advanced Level (A/L) Examination in the Physical Science stream.
- Achieved results: 1 C pass in ICT and 2 S passes in Combined Mathematics and Physics.
- Developed strong analytical, problem-solving, and logical thinking skills through A/L studies in science-based subjects.

PROJECTS

Secure Client-Server Communication System

SLIIT – 2nd Year 2nd Semester

- Built a multi-client TCP/IP system with salted password hashing, session tokens, rate limiting and brute-force lockout protection.
- Implemented fork()-based multi-client handling, zombie prevention and server-side event logging with IP and timestamp tracking.

Web-based Train Scheduling and Ticketing System

SLIIT – 2nd Year 1st Semester

- Developed a web-based train scheduling and ticketing system using Java and MySQL.
- Implemented core CRUD operations (Add, Update, Delete, View) with file-based data storage for persistent record management.

IoT based Automated Greenhouse

SLIIT – 1st Year 1st Semester

- Developed a GreenHouse IoT monitoring system to simulate smart agriculture with real-time environmental tracking and automation concepts.
- Implemented core features such as sensor-based data collection (temperature, humidity, soil moisture/light simulation) and basic control logic for environment regulation.

CERTIFICATIONS

- Web Application Development : Webcomms Global (PVT) Ltd and LK Domain Registry
- Introduction to Cyber Security : Cisco Networking Academy
- Endpoint Security : Cisco Networking Academy
- Cyber security – Understand Threats and Prevent Attacks : Alison

TECHNICAL SKILLS

Languages: Java, Python, C, SQL

Security Tools: Kali-Linux, Metasploit, Ubuntu

Concepts: Network Security, TCP/IP, Threat Analysis, Cryptography

Soft Skills: Problem Solving, Teamwork, Analytical Thinking, Time Management
